

Para Image™ III

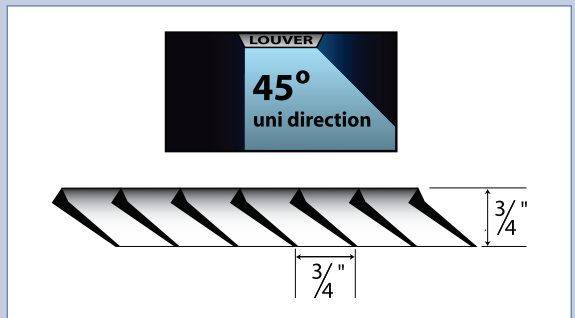

45° Directional Louvers

3/4" x 3/4" x 3/4"

- Specialty Applications
- Low Brightness
- Aesthetically Pleasing
- High Efficiency

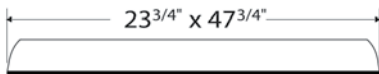

The Para Image III directional louver has been created to illuminate and accent vertical surfaces. The unique 45 degree angular blades, when properly positioned, reflect the light onto any task area, resulting in the total elimination of direct and veiling glare. The Para Image III louver can be used to accent walls, sculptures, displays and paintings. Perfect for creating that special look. This product is also commonly used in tele-conferencing, training and theatre environments where light must be directed away from viewable screens.

The Para Image III is a unique louver for unique applications. If the stock sizes don't fit your need, our fabrication division can customize this louver to any size 4' x 4' or smaller.
