

LI-22 Premier

Acrylic Sheet

The LI-22 product is a premium grade acrylic sheet suitable for many applications from replacing windows to manufacturing displays. Our stocking items are listed below and many other colors are available on special order. We inventory 4' x 8' sheets in various thicknesses up to .236" and can custom cut to any size- per your specifications. These acrylic sheets have polished surfaces on both sides and are covered with a protective laminate during transit.

A - Overall Thickness

**Other sizes and colors available upon request, please call.

When ordering please provide cut size. Cut to: _____ x _____ ie. 11 3/4" x 47 3/4"

LI-23 Premier

Female Conical Circular Prism

The LI-23 is a prismatic panel with a 3/8" female conical circle centered inside a 3/8" prismatic square. The orientation of the circle/square combination is parallel to the edge of the material and runs in straight rows. This panel is one of the most efficient lenses offered. The truss shaped prism design prevents sagging, while the two prism shapes keep the light distribution uniform, giving you the definition you want. Available in sizes up to 4' x 4'.

Note - the Amber panel is a UV-BWF panel designed for the printing industry to block ultra-violet and blue light waves.
