

Para Image™ I

Parabolic Louvers

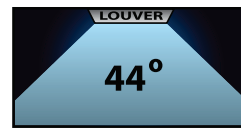

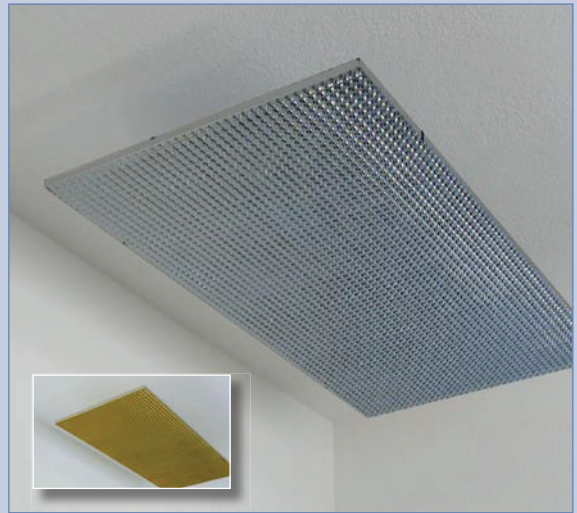

5/8" x 5/8" x 3/8"

- Ergonomically Designed
- Low Brightness
- Aesthetically Pleasing
- Universally Adaptable
- Acrylic or Styrene

Para Image I is the most effective louver ever designed, it controls the light in such a precise manner that glare is virtually eliminated, while full illumination is directed to the required areas.

When the environment requires critical and difficult visual tasks or when glare control and light diffusion are extremely important, the Para Image I is the louver to use.

The Para Image I is available with two different molded flanges or in a full ceiling size, making it universally adaptable for nearly any design requirement. Our fabrication division can customize this louver to any size 4' x 4' or smaller. Call for details.

Technical Data

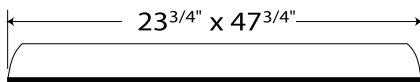

Efficiency: 41.9%
 Shielding angle: 44
 V.C.P. 100%
